Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Vietnamese Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the Bank's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control. 4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

4.15 Business combinations and goodwill

Business combinations are accounted for using the cost method. The cost of a business combination is measured as the fair value of assets given, equity instruments issued by the acquirer in exchange for control of the acquiree and liabilities incurred or assumed at the date of business combination plus any cost directly attributable to the business combination. Identifiable assets and liabilities and contingent liabilities assumed in a business combination of the acquiree are measured initially at fair value at the date of business combination.

Goodwill acquired in a business combination is initially recognized at cost being the excess of the cost the business combination over the acquirer's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities. If the cost of a business combination is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the consolidated statement of profit or loss. After initial recognition, goodwill is recognized at cost less any accumulated amortization. Goodwill is amortized on a straight-line basis over a period of ten (10) years.

The actual maturity date can be adjusted from contractual term when the contract is extended. In fact, demand and term deposits of customers may be rotated, and therefore, lasting beyond the original maturity date;
- ▶ The maturity of loans to customers from debts purchased is determined based on the due date of the loan contract as prescribed;
- ▶ The maturity of derivative contracts (Swap, Forward) is determined based on the contractual term of the transaction net basis of clearing between cash inflows and outflows;
- ▶ The maturity of other assets and other liabilities is classified according to the payment characteristics of each item.
- ▶ For assets and liabilities whose expected payment date/due date cannot be determined, the Bank determines the maturity date according to the conservatism principle. Accordingly, it is considered long-term (over 1 year) for cash inflows and short term (less than 3 months) for cash outflows.

Classification of assets and liabilities according to the original term prescribed in contracts or in the issuance term is as follows:
